

HomeKeeper Pro - Apple App Store Review Guide

QUICK START TESTING INSTRUCTIONS

1. ONBOARDING SETUP:

- Enter zip code "**64113**" during initial setup
- Select "Single Family Home" for home type
- Choose any square footage (suggest 2000 sq ft)
- Select "1960s" for home age
- Choose "Proactive" maintenance style
- App automatically generates 5 sample tasks and 9 equipment items

2. NO LOGIN REQUIRED:

- App works entirely with local storage
- No user accounts, passwords, or internet required
- All data stored securely on device only

KEY FEATURES TO TEST

DASHBOARD SCREEN:

- Real weather integration (87°F scattered clouds for Kansas City)
- Home location display
- Task summary with completion tracking

- Money saved from maintenance tracking

TASK MANAGEMENT:

- View 5 pre-loaded maintenance tasks
- Complete tasks to see recurring task generation
- Money saved calculation (e.g., \$400 for deep cleaning)
- Smart scheduling based on equipment and seasons

EQUIPMENT TRACKING:

- 9 pre-loaded equipment items (HVAC, Water Heater, etc.)
- Equipment-specific maintenance recommendations
- Age-based maintenance scheduling

ADD NEW TASKS:

- Create custom maintenance tasks
- Set priorities and schedules
- Equipment association options

SAMPLE TEST DATA PROVIDED

- **LOCATION:** Kansas City area (39.0184995, -94.5920501)
- **WEATHER:** Real-time integration with OpenWeatherMap
- **TASKS:** Replace HVAC Filter, Water Heater Inspection, Test Smoke Detectors, etc.
- **EQUIPMENT:** HVAC System, Water Heater, Smoke Detectors, Roof, Gutters, etc.

TECHNICAL NOTES

- Built with React Native/Expo
- Local AsyncStorage for data persistence
- Weather API integration with fallback to mock data
- No backend servers or databases required

- Fully functional offline
